From the Editor

Happy New Year everyone! I hope that everybody had a safe holiday season. It seems that chess event opportunities keep getting better and better for Colorado chess players. 2013 was a good year to find a tournament somewhere and it looks as though 2014 is going to be even more exciting for us.

Those who have the inclination to do so have taken up the reins and are creating more tournaments than ever before. Bravo to all who have done so!

Maybe with all these opportunities will come more out of state players as well as more Grandmasters. In 2012 GM Alex Yermolinsky paid a visit to the *Colorado Open*. And in the past two years of the *Bobby Fischer Memorial*, GM Tejas Bakre has travelled to our beautiful state to play. Then in November of last year, GM Timur Gareev stopped by the Denver area to take a tour and play some locals in blindfold chess amongst other chess related activities. (*You can read about his blindfold exhibition here: <http://tinyurl.com/kuw9vz8>.*)

2013 was a good year for chess in Colorado and 2014 looks to be an even better one for those of us who play the royal game!

May Caissa be with you.

Fred Eric Spell

The President Speaks

At the end of 2013, I'm happy to see the great attendance we've had at our recent tournaments. The Denver Open in particular had over 100 participants. We've also seen some great new tournaments organized and run. The creativity of our membership for running some truly unique tournaments is wonderful. Downtown Denver had a 4-round event at the 16th Street Mall Corner Bakery, which was a different environment for a weekend tournament but still an enjoyable way to play chess at a central location. Shirley Herman also ran the first Colorado twenty-four hour marathon tournament in a decade at her place, drawing 25 participants.

We've also had one big name player visit our state a couple of times – Grandmaster Timur Gareev played a group of 15 local players in a blindfolded simultaneous exhibition on November 2nd. I watched the first hour or two of this, and it was amazing to see GM Gareev sitting in the corner with a blindfold over his eyes naming his chosen move for each board as Chris Peterson and Paul Baxter went around moving the pieces accordingly. I know I'd be hard pressed to complete just **one** game of blindfolded chess, let alone 15. And his winning percentage was impressive as well with 13 wins and 2 draws (to Tim Brennan and Gunnar Anderson). He also visited some of the chess clubs (scholastic and adult) in the Northern and Central part of the state a few weeks later, a real treat for those clubs. And thanks to VP Brad Lundstrom's hard work, we had

both newspaper and TV exposure for this.

Coming up, we have some of our championship events – the Colorado Closed, the Scholastic Championships, and the return of the Class Championships that determine our choices for the Colorado/New Mexico team match in the summer. There are also many chess tournament choices coming up, including a blitz event at the Corner Bakery in January and the return of the Boulder Open in March. It's truly a great time to be a chess player in Colorado and I encourage everyone to take advantage of these bountiful opportunities.

As always, please feel free to approach me with any suggestions for how to make Colorado chess better.

Randy Reynolds

Blast From the Past

Attached is a game from the 1963 Colorado Open that was submitted by Mark Derby of South Dakota to Richard "Buck" Buchanan. Mark writes:

"Fifty years ago Dr. M.F. Anderson of Rapid City, South Dakota traveled to play in the 1963 Colorado Open. I took the game from the South Dakota Chess Association game archive. Dr. Anderson was the South Dakota state champion in 1939, 1940, 1946, 1947, 1952, and 1955-59."

(Comments are by Matt Furze in the SDCA Bulletin dated September 1, 1963).

Marvin Methven (1794)
M.F. Anderson (1883)
 Colorado Open CO / Round 3
 July 5, 1963

1.e4 e5 2.Bc4 Nf6 3.Nf3 Nc6 4.Ng5 d5 5.exd5 b5 The imaginative Ulvestad Variation. MCO claims it is somewhat better for White.

6.Bb3 Or 6.Be2 Nd4 7.Nc3 Nxd5 8.Nf3 Nf4, with equal chances. For White 6.dxc6 bxc4 7.Qe2 h6 8.Ne4 Qd5 9.N1c3 is better.

6...Na5 6...Nd4 7.0-0, says MCO, may be White's simplest and strongest treatment. Black, however, wants to try something different.

7.d3 Nxb3 8.axb3 Nxd5? - Dr. M.F. Anderson. He now has some anxious moments for a few moves.

9.Qf3 f6 10.Nc3 Bb4 11.Nge4 0-0 12.0-0 c6 Just in time!

13.Nxd5 cxd5 14.Ng3 Be6 Black has equalized very well and has the bishop pair to his credit. His task now is to find a path to victory, if such exists.

15.c3 Bc5 16.Rd1 Qc8 17.h3 d4 18.c4 Other moves leave White with both doubled, isolated pawns and an isolated pawn, in addition to the problems of defending them. 18.cxd4 Bxd4 19.Ra3 Qc2!! and White's position crumbles.

18...b4 19.Bd2 And now the value of Black's last move becomes apparent. White is saddled with a bad bishop.

19...a5 20.Re1 Rf7 21.Kh1 Rfa7 22.Reb1 a4 23.bxa4 Rxa4 24.Qd1 Qa6 Or ...Rxa1 25.Rxa1 Rxa1 26.Qxa1, which virtually draws. White's next move is forced.

25.Rxa4 Qxa4 26.b3 Qc6 27.Kg1 Ra2 28.Bc1 f5 29.Bb2 Be7 30.Qc1 Bh4

31.Ra1 White has been maneuvering to trade rooks these last few moves; he finally gets the job done.

31...Ra8 32.Rxa8+ Qxa8 33.Qa1 Qxa1+ 34.Bxa1 Bg5 35.Bb2 g6 36.Ne2 f4 37.f3 Bf5 38.Nc1 Kg7 39.Kf2 Kh6 40.Ke2 Kh5 41.Na2 Be7 42.Bc1 Kg5 43.Bd2 Kf6

White gets a 2nd passed pawn, but Black's king can stop them, since his king can't leave the d-pawn. For instance, 44. Nxb4 Ke6 (Black must keep the two bishops as long as possible.) 45.Na6 Kd7 46.b4 Kc6 & with exacting play, the game is still a draw.

1/2-1/2

Through the Looking Glass of Game Five of the World Chess Championship

by Grandmaster Tejas Bakre

It was worth a visit to the “Chess Planet” which was created during the World Championship at Chennai in November 2013. Fortunately I took time off from my work schedule and entered the spectacle for chess which I had never seen before. Right from setting foot at the airport to making my way through the city to reaching the venue, I could see chess posters surrounding the city! Print media, air media, TV media was flowing with the news of the king (Vishy Anand) and the Challenger (Magnus Carlsen) who had flown from a few shores away to snatch the kingdom! So let’s look at his first major blow to the fort after which the kingdom collapsed and the king Anand had to surrender to the mighty youth Carlsen. Note: I have tried to explain moves in critical positions rather than analysis by the silicon monsters.

Vishy Anand & Magnus Carlsen before the start of the match. (Source: Reuters)

Magnus Carlsen (2870)
Viswanathan Anand (2775)
 World Chess Championship / Chennai
 Game 5 / November 15, 2013

1.c4 Carlsen’s chess had always been going into non-theoretical lines and just to play chess keeping the board alive. He doesn’t deviate from this strategy even when fighting for the world crown. In fact the first few games were pretty lackluster where White was getting no advantage at all. A very rare scenario in World Championship matches.

1...e6 2.d4 d5 3.Nc3 c6 4.e4 dxe4 5.Nxe4 Bb4+ 6.Nc3 6.Bd2 Qxd4 7.Bxb4 Qxe4+ 8.Be2 Na6. This is one of the main theoretical positions where White sacrifices a pawn for initiative. As Anand’s opening preparation in sharp continuations is extremely precise, Carlsen chooses a safe variation which might not have been deeply analyzed by Carlsen’s team.

6...c5 7.a3 Ba5 8.Nf3 Nf6 9.Be3 Nc6 10.Qd3!? A completely new idea by Carlsen in a very offbeat line. The idea is very simple. He wants to 0–0–0, exchange queens getting a 3 vs 2 queenside majority and play a long game!

10...cxd4 11.Nxd4 Ng4! Vishy comes up with a very strong idea of taking off the e3 bishop.

12.0–0–0 Nxe3 13.fxe3 Bc7?! This was a very passive decision by Anand which

helped Carlsen get exactly what he wanted! 13...Qe7 Keeping the queens on would have been a better decision. Vishy thought that he could hold on the slight worse endgame position. In general this decision of not going for activity was the major reason that cost Vishy the match without gaining a single win. Also Vishy’s strong point has been his great sense of initiative and attack which probably he decided not to go for fearing that Carlsen was stronger in this territory than him.

14.Nxc6 Carlsen immediately latches on to the opportunity of playing a level endgame with miniscule advantage which is enough to keep the game on and putting pressure on Vishy.

14...bxc6 15.Qxd8+ Bxd8 16.Be2 Ke7

16...Bb6. Was an interesting choice but very difficult for humans to calculate and evaluate the position. 17.Bf3 Bxe3+ 18.Kc2 Bd7 19.Rhe1 Bb6 20.Ne4. Good initiative for the pawn and Carlsen being dangerous in such types of situations Vishy avoids it.

17.Bf3 Bd7 18.Ne4 Bb6 Vishy chooses a forced continuation after which reduces the material further but not the dangers!

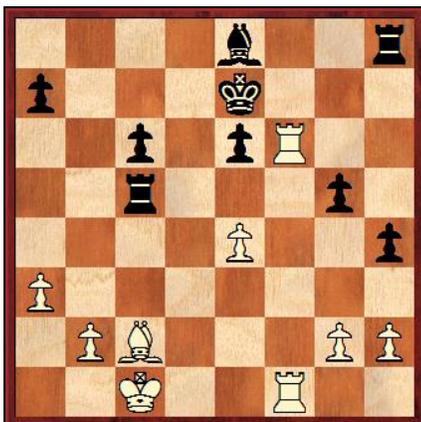

19.c5 f5 20.cxb6 fxe4 21.b7! Ensuring that Black stays with four pawn islands.

21...Rab8 22.Bxe4 Rxb7 23.Rhf1 Rb5 24.Rf4! A very subtle move. Keeps your opponent guessing whether I wish to double on the f-file or d-file & whether I want to use the rook for attacking the kingside pawns or queenside pawns! A typical strong point of Carlsen. Keeping the opponent guessing and forcing him to work harder on the board.

24...g5 25.Rf3 h5 All of it seems great for Black. Advancing pawns in the endgame, gaining space. Carlsen sees them as a potential weakness in the future!! This is where Carlsen is ahead of his time and that is why he is almost 100 points ahead of the world's number 2!! The reason why Fischer dominated is also because he could foresee things which his opponents could not even dream of.

26.Rdf1 Be8 27.Bc2 Not leaving anything hanging. Such moves help in saving time as his opponent can't gain time attacking them in the future.

27...Rc5 28.Rf6 h4 29.e4! Going against the principle that one shouldn't have pawns as the same color as the bishop. Taking away the d5 square from the rook so that his king can be in the center in order to unpin his bishop.

Game 5 under way.

29...a5 30.Kd2 Rb5 31.b3 Bh5 32.Kc3 Rc5+ 33.Kb2 Rd8 34.R1f2 Rd4 35.Rh6 Bd1 36.Bb1!! Amazing idea which Vishy would have missed when he went for counter play with 34...Rd4.

36...Rb5 37.Kc3 c5 38.Rb2! Amazing defense by Carlsen and now suddenly Black's kingside pawns are defenseless!!

38...e5 39.Rg6 a4?! Fatigue and uncertainty making the World Champion crack. 39...g4 Should have been the right way to hold on to the position.

40.Rxg5 Rxb3+ 41.Rxb3 Bxb3 42.Rxe5+ Kd6 43.Rh5 Rd1 44.e5+ Kd5 45.Bh7 Rc1+?? Vishy blunders missing a very important intermezzo check in his calculations. 45...Ra1 Might still have drawn according to the silicon beasts!

46.Kb2 Rg1 47.Bg8+ Kc6 48.Rh6+!! The intermezzo check he missed while playing 45...Rc1+.

48...Kd7 49.Bxb3 axb3 50.Kxb3 Rxg2 51.Rxh4 And now the a and h pawns roll and Black just can't stop both.

51...Ke6 52.a4 Kxe5 53.a5 Kd6 54.Rh7 Kd5 55.a6 c4+ 56.Kc3 Ra2 57.a7 Kc5 58.h4 1-0

This was the turning point of the match. The way Carlsen won the position out of absolutely nothing must have completely shaken the World Champion's confidence. It was impossible for him to come out of this and Carlsen just rolled over from then on.

A thoroughly deserved crown for Carlsen. The World Championship title was the only thing eluding him from being termed as a legend and now he surely becomes one.

(Editors Note: The Gentlemen's Chess Club would like to thank GM Bakre for his analysis of this game and also for participating in the Bobby Fischer Memorial the past two years.)

Games From the 2013 Tri-Lakes Open

by Fred Eric Spell

With a beautiful weekend for chess, 56 players arrived to do battle over the 64 squares in the 2013 edition of the Tri-Lakes Open. What follows are some of the games befitting the beauty of the location.

Congratulations go to the five players who tied for first place; Chris Peterson, Kevin Seidler, Ryan Swerdlin, LM Brian Wall and Jackson Chen, with Chris Peterson taking home the trophy based on tie-breaks - the Tri-Lakes Open stein.

I want to thank Joe Fromme, Jr. for helping out with setting-up and for being my Assistant TD. I greatly appreciated his hard work. Also, to all the players who showed up to play, thank you everyone and I hope to see you next year!

(I also wish to thank Shirley Herman for the pictures for this article.)

Perfection at the 2013 Tri-Lakes Open

by Joe Fromme, Jr.

In the final round on board one, Lifemaster Brian Wall boldly presented a massive pawn front against Kevin Seidler's macho Grunfeld, and yes, my friends it was interesting. My Columbian coffee house analysis revealed that after 17 more moves Black would attain clear advantage, and of course, my HAL 9000 computer, verified my data. Apparently, Brian saw the same line and he offered a draw. Luckily for him, Kevin overlooked it and after some reflection accepted his draw offer. Realizing my idol would not achieve a perfect score, depression overcame my world.

Eventually becoming bored with my completely self absorbed bummeriness, I weakly gazed up to see Chris Peterson playing Black against Mark Schlagenhauf on board 2. Wow, seeing Chris had to be good enough for my wood pushing view-age! The moves already played were:

1.d4 Nf6 2.c4 e6 3.Nc3 d5 4.Bg5 c5
5.cxd5 cxd4 6.Qxd4 Nc6 7.Bxf6 gxf6
8.Qd2 exd5

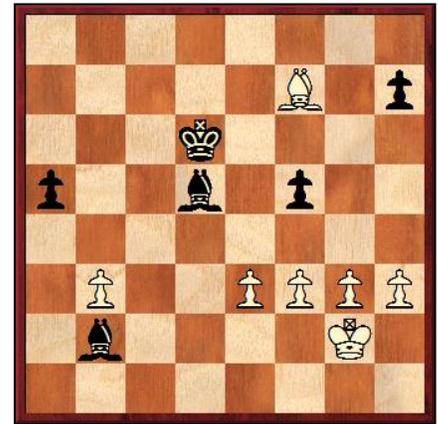

Hmmm...pausing, feeling intellectual, at least appearing wise, I pondered the inferior pawn structure with pawn deficit. Did the champ blunder? Entering this question into my HAL 9000 elicited an immediate response in his usual smooth and exquisitely mellow voice. "Hello Joe, the first time you act the patzer it is rather precious in a Bambi sort of way, but later, it gets really old." The battle continues –

9.Qxd5 Be6 10.Qxd8+! Rxd8

I get it now Hal, a small lead in development with bishop pair as compensation for inferior pawn structure and pawn deficit. I'm not sure what happened to my computer buddy next, but there was an

unmistakably strong vibration accompanied by a faint but undeniable smokey odor, and than his LED's blinked out.

11.e3 Nb4 12.Bb5+ Ke7 13.Rc1 a6

Recent Advances in the Reverse Modern Opening A00

by Colin James III

I. Introduction

Beginning with 1.d3, the Mieses opening A00 often transposes into variations in the Reti opening A07 as the database variation named New York and Capablanca Systems. In this analysis the Mieses opening is more exactly called the Reverse Modern or Reverse Pirc. (This is pronounced as “Peerts” to rhyme with “peer” and ending in sibilant “z”.) This paper is to complete a two-part opening theory project that began over eight years ago¹ as the opening moves for Black from 1...d6. The rationale was to evaluate a single set of opening moves to be playable on either the White or Black side so as to minimize the amount of opening theory for non-experts to remember.

II. Experimental apparatus and implications

A. Software and Hardware

The software used in the final preparation of this analysis was the Chessbase interface and Houdini 4 Pro x64B engine where “B” designates the 64-bit instruction set of Intel. Three computers were used: Dell desktop 1; Dell laptop 2; and HP desktop 3. There were respectively 2, 4, and 5 processing cores and 3072, 4608, and 9216 GB of memory allocated to look up tables. The total computing power for Houdini 4 Pro was 11 cores and 16.90 GB of hash RAM. The total processing time was less than 120-hours. That elapsed time could be minimized further if the Houdini engine used a better consolidator and garbage collector for its binary tree and hash table implementation. This implied that the user may improve engine performance by manually clearing the hash table; such as at known pivot points in the move tree, even though the documentation of the Houdini engine somewhat discouraged this practice.

B. Test Environment

The same operating system versions and hardware loads were used, namely, no

cloud computing and no access to the internet or to chess databases. Laptop 2 ran about as fast as desktop 3. Although the respective hash table memory sizes were doubled from 4.6 to 9.2 GB, the engine performance was only slightly improved for desktop 3. By linear extension what followed was that the maximum 256 GB memory space for look up tables as supported by the Houdini engine was not necessarily more effective than a 128 GB memory space. Desktop 3 had one more core (5) than laptop 2 (4). Again, the improved performance was trivial. This implied that a laptop with four processing cores and 4.6 GB look up table memory was sufficient for practitioners to replicate the analysis here.

C. Previous Work

Prior work involved multiple core machines running various engine versions of Fritz, Houdini, and Rybka under the interfaces of Chessbase and Aquarium. The total previous processing time was over eight years at 72,000 hours or 4.3 million minutes. Experiments were performed without access to or reliance on chess databases, in order to insulate results as dependent exclusively on the chess engine tested. After the introduction of Houdini 4 Pro in 2013, the difference in performance of processing time reflected an improvement in the algorithms of chess engines over the last eight years since 2005. Unfortunately such improvements in game theory did not apply to or affect stochastic artificial intelligence networks (SAINs) which continued to remain in the AI-winter for over the last 30 years.

D. Exceptions Raised

During the experiment, the Houdini 4 engine was discovered defective because at move 13 ply 1, desktop 3 produced inconsistent results. Therefore the instant analysis was correct after move 12 for only desktop 1 and laptop 2.

III. Moves 1-13, ply 1

1.d3 e5 2.Nf3 Nc6 3.g3 d5 4.Bg2 Bg4 5.O-O f6 6.c4 d4 7.Qb3 Rb8 8.Qa4 Qd79.a3 Nge7 10.b4 Nc8 11.Nbd2 (transposes as 11.Re1 Be7 12.Nbd2 O-O (transposes as 12...a6 13.Ne4 O-O)) ...Be7 12.Re1 O-O 13.Ne4 (...0.07).

White's defensive strategy is to fianchetto the White king's bishop at move 4.Bg2. This position was used extensively by Sammy Reshevsky as a trademark for four reasons. First, the bishops command the most potentially continuous diagonal squares. Second, castling behind the structure is more difficult for Black to attack than castling behind three pawns together on the second rank in a neat row. Third, the bishop is somewhat protected to preserve it longer for the middle and end game. Fourth, when pieces are moved out of the diagonal control of the White bishop, sometimes Black pieces are discovered and exposed to attack, such as a Black rook on a8.

White castles early on move 5.O-O.

While the structure is defensively sound to withstand immediate attack by black sacking or sacrificing pieces, the castling does telegraph where the White king is, and so the king becomes a less mobile target than before castling in the middle file.

White's offensive strategy is to lure Black into an extended position in the center that cannot be maintained by a supply line from behind and hence becomes isolated in segments. To that goal, White passively surrounds the center with indirect pressure rather than attempting overt aggression.

Black's defensive strategy is not readily apparent, other than to foil the strong placement of White's fianchetto bishop and inhibit the range of White's other bishop. Black soon adopts a strategy not to make the Black king a target by castling as early as White. Hence Black delays castling until later at move 12...O-O by relying in the meantime on the king's presence in the center on the assumption

that the center will continue under Black control and hold.

Black is also ever aware of the development of White's other bishop at c1. If the Black knight develops to Nf6, then Black entertains White's potential Bg5 as a nuisance pin against the Black queen. Black may proactively inhibit this. But that could lead in piece exchanges to Black's pawn structure on the king side becoming disrupted and weakened from its original continuous single rank behind which the Black king may castle.

To foil that threat, Black may wait for the White bishop to move as Bg5, and then kick the bishop with h6. Black effectively challenges the White bishop immediately to attack or to retreat. Such an exchange is probably more advantageous for White. This is because after ...Nf6, Bg5 h6, Bxf6 Qxf6, the Black queen loses its previous span of control in the center and is dismissed to the king flank as a nanny. There the Black queen has diminished access to the center and the queen side of the board.

The alternative to Black's h6 is not to develop the Black knight as Nf6 but rather to advance the Black pawn as f6. While this thwarts the White bishop as Bg5, there is a price Black pays, namely, how to develop the Black bishop from f8. Black also knows the f6 is a sensitive and weaker square needing protection next to the king on e8 or g8 if castled. The only place for Black's knight to go is as Ne7, but that completely blocks the Black bishop in a restricted position. If Black wants to castle king side, Black must prepare the space by moving the king's knight and bishop out of the way in a minimum of three moves: Ne7 then Ng6 and Be7 or elsewhere. This forces Black to delay castling.

Black's offensive strategy is to develop the Black bishop from c8 as Bg4. This pins the White knight against a pawn and

indirectly against the White queen. Black's next task is to attack the White fianchetto bishop and pawn structure in front of the castled White king. The standard pattern of attack is Bh3, but only after Qd7. (This type of pattern obviously does not work with those pieces in reversed order.) For the purpose of supporting the bishop on g4, the move Qd7 is better than Qc8 because the queen is raised from the back rank. However, the Houdini engine temporarily abandons the attack of Bh3 in lieu of the more immediate plan below.

IV. Pivot Point: Move 13, ply 1

Using the machine desktop 3, the Houdini engine produced 13.Nh4 (-0.14 depth 31). Because this was deemed to be a spurious result, desktop 3 was abandoned for testing of that position. (*The product reseller solicited the error to inform the vendor for "the bug list to be fixed"; when this error was not forthcoming, the vendor denied the product was defective, but reimbursed anyway, meaning the vendor acknowledged the defect*).

The pivot point in a sequence of beginning moves sometimes marks the gradual transition of beginning game to the middle game, such as between moves 12 to 16. In this analysis, the pivot point comes at move 13 ply 1 and coincidentally with the engine malfunction. On the surface, neither one of the moves Nde4 or Nfh4 immediately attacks an unprotected Black piece. This subtlety illustrates the noble joy of chess: its essence is not in the piece that is moved, but in the piece that is not moved. Move 13 ply 1 marks a pivot point that is not a slow transition but a violent transfer of power from Black to White with statistical equality for White. It is at this point that the Houdini engine begins to favor White. Therefore White adopts the assault below to contest the center because of Black's anemic kingside development with no major Black piece on the king side.

A further cause of this pivot point may be that 5...f6 ultimately backfires when Black castles as 12...O-O. This is because behind Black's extended pawn string from g7 diagonally to d4 is a vacant diagonal d5 to g8 which serves as an unobstructed route to outflank the Black king at g8.

V. Moves Subsequent to 13, ply 1

13...a6 14.Qc2 Nd6 15.Nc5 Qc8 16.Nb3 Rd8 17.b5 axb5 18.cxb5 Na7.

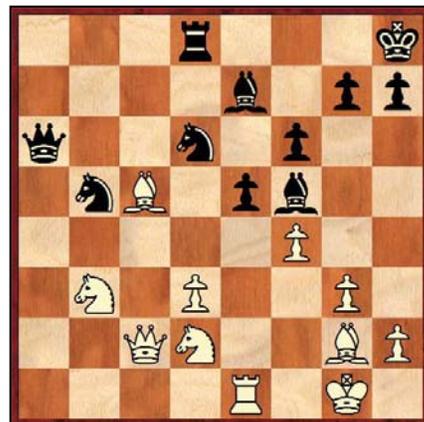

19.e3 (transposes as 19.a4 b6 20.e3 dxe3 21.Bxe3) ...dxe3 20.Bxe3 b6 21.a4 c5 22.Nfd2 Bf5 (0.31 depth 27).

From move 22 ply 2, these variations are presented in passing:

22...Bh3 23.Bxh3 Qxh3 24.f4 h5 25.fxe5 fxe5 26.Nc4 Nxc4 27.dxc4 h4 28.Qg2 Qe6 29.Nd2 Nc8 30.a5 bxa5 31.Rxa6 hxg3 32.hxg3 Qg4 33.Qf3 Qg6 34.Ne4 Rf8 35.Qg2 Qg4 36.Ra6 Nb6 37.Qc2 Rf7 38.Bf2 Qh3 39.Ra7 Rbf8 40.Rxe7 Rxf2 41.Qxf2 Rxf2 42.Kxf2 Qh2+ 43.Kf3 Nxc4. (0.44 depth 31)

22...Nf7 23.Nc4 Bf5 24.Be4 Qe6 25.Nbd2 Bxe4 26.dxe4 Rd7 27.Reb1 Rdb7 28.Qd3 Bf8 29.Kg2 Rd8 30.Qb3 Rdb8 31.f3 Qd7 32.Na3 Nc8 33.Ndc4. (0.53 depth 31)

22...Bf5 23.a5 Naxb5 24.axb6 Rxb6 25.Bxc5 Ra6 26.Rxa6 Qxa6 27.f4 Kh8 (0.31 depth 27).

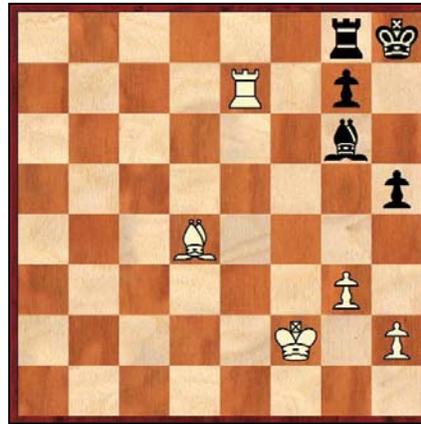

One continuation proceeds as: 28.Bf1 Qc8 29.Qc1 Qb7 30.fxe5 fxe5 31.Rxe5

Bf6 32.Re3 Qf7 33.Qe1 Bc8 34.d4 Bb7
35.Qf2 h6 36.Be2 Bd5 37.h4 Qd7 39.Kh2
Kg8 (0.25 depth 30).

Another continuation proceeds as: 28.Nf3
Qc8 29.fxe5 Nb7 30.exf6 Bxf6 31.Ne5
Bxe5 32.Rxe5 Bxd3 33.Bxb7 Bxc2
34.Bxc8 Rxc8 35.Nd4 Nxd4 36.Bxd4
Rg8 37.Re7 Bb3 38.Kf2 h5 (0.14 depth
30).

VI. Conclusion

In this opening White succeeds in the goal to lure Black into an unsupported center with long pawn string from g7 to d4. This opening may reduce to a contest of how each side best develops the bishops from c1 and c8, thus demonstrating a lesson in how to place bishops effectively early in the game. Much of the timing strategy for both sides is directed to this effort. The Houdini engine makes this clear in the various defensive maneuvers

such as 4.Bg2 and 5...f6. What follows from this analysis is a second look at Black's strategies derived in the earlier paper¹ from the lesser mature Fritz engines.

The Game of Nobles

by Tana Lorenz

I did not start life as a slave, quite the opposite really; I was the youngest child of the noble house Narabi. I had slaves that waited on me; helped me dress, washed my hair, and cooked my meals among other chores I did not even know existed. As a girl child I was not really worth much to my family unless they could marry me off to a more powerful house, but that was doubtful. Well, actually, the probability of that was impossible since I am a half breed. I am my fathers' daughter with his fifth wife. I had many older siblings, but I would not be here if my father had not won my mother in a game of the nobles which her people call it Chess. I grew up learning the rules of Chess playing with my father he even taught my mother who previously could not even hold a chess piece, a piece of her people because she had been a slave.

My mother's people were captured hundreds of years ago when they fled their planet in the final throws of its death. She and her people are very different from us; their skin comes in a variety of colors from pink to black of night. They do not have horns like my father's people. They are shorter, and they do not live as long. My father's people have lavender skin. Even the shortest old women stand two heads taller than my mother. Their life span is double in length. Really the only thing that varies in our people is the shape and size of our horns. I carry more of my mother's traits than my fathers'; my skin is pink with a hint of lavender, my horns barley peak out beyond my crow black hair. But even with all my short fallings I am blessed with her big eyes and their blue coloring.

I am torn from my memories by the sound of the front door slamming. I busily turn back to my scrubbing, happy memories are for another time. My master is home and by his heavy footsteps he did not have a good day at Court. I have been in service to the Danri house for two years now; I was sold to Tangen Danri to repay my father's gambling debts. Today, however, is the day I play for my freedom using the very tool that put me here, Chess. Slaves caught with any pieces, a board, or even practicing would be exe-

cuted. That is why I have to win. If I do not I will lose my head.

"Alessia Narabi, isn't today the day you go to meet the axe man?" Tangi Danri the youngest boy of the Danri house taunted me from the doorway.

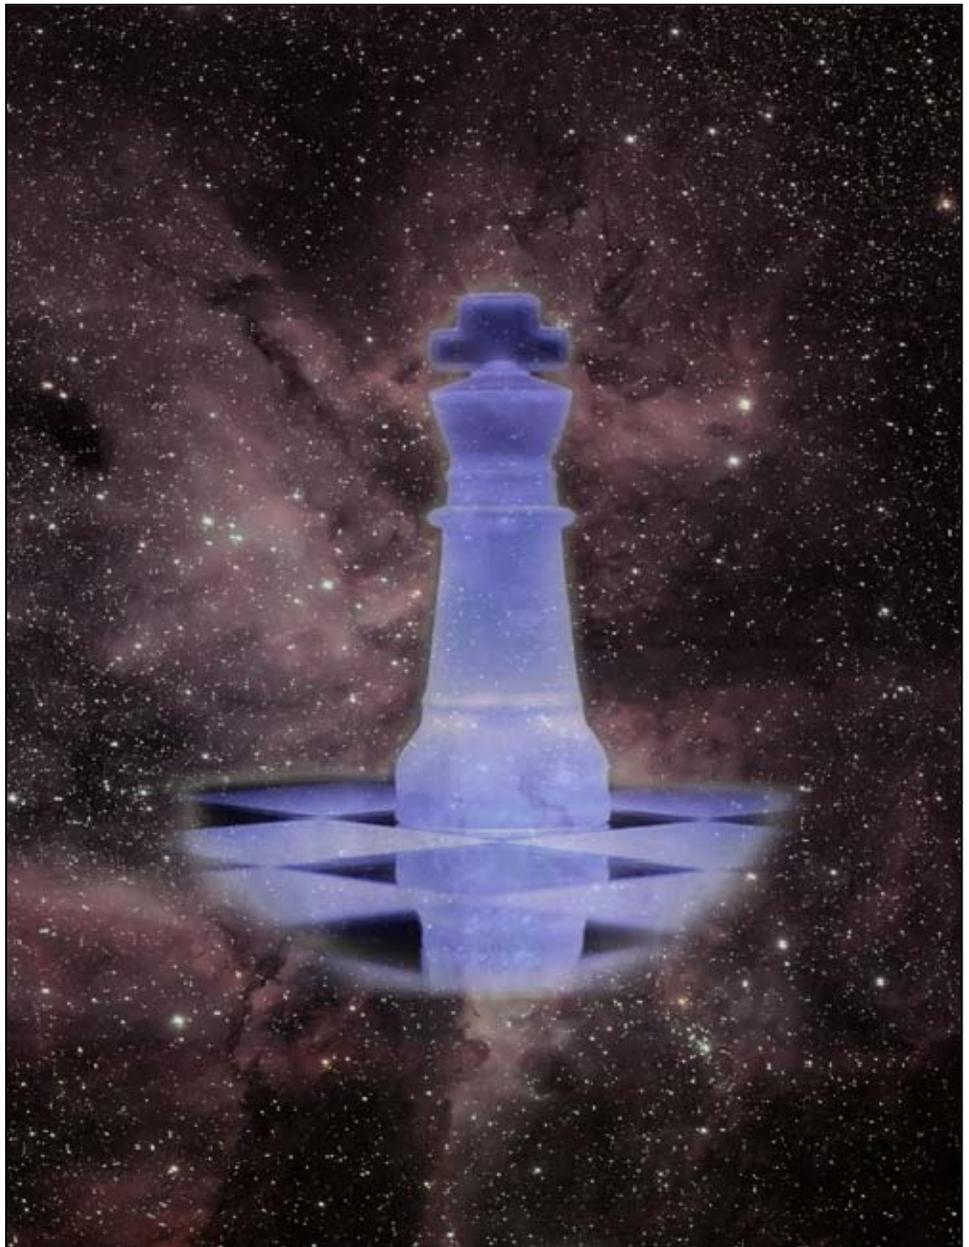

"No Nobility, today I become free," it is all I can say. If I speak my mind I am liable to actually meet the axe man and never be free and breathing again.

"Nobility, your father has sent for you," Killian bowed before Tangi then he straightened and pointed to the opposite wing of the family home. Once Tangi had disappeared Killian turned back to me, "are you ready for today Alessia?"

He was one of the kindest free human servants I had encountered. Most treated enslaved Traxians lower than low, but who could blame them?

"I am ready as I can be; the Grand Master I will be playing is my brother. I have to play my best, or I die. I was told we would play five total games, so best of five wins. Killian, I wanted to thank you for all your help over the last two years. You put your freedom on the line so I may play for mine. Without your training I would have been a slave the rest of my life."

"Do not thank me until you have won, Alessia. But once you do win you can stay with my family or go back to your

father, it is your choice.” Killian smiled and left me alone to think and to prepare.

Tangen Danri led a small party and myself into the game hall below the family’s main living space. There on cushions sat my oldest brother, the Grand Master, and my father. The Chessboard was already set up before him; the white and black pieces gleamed in flickering candle light. The ceremonies were completed in a whirl. My nerves were already in my throat, the rules were set, no timer for moves best of the five games wins.

The first game was over before I knew it, in thirty moves, his rook checked my king at F7 forcing it into the exposed G6 square; Tangen chuckled to Tangi at my folly. I took a deep breath as we reset the board. If he won the next two I would lose more than the match. Game two started with our pawns meeting and he claimed my first. Once he moved his knight I claimed his pawn, but his knight claimed my second pawn. My nerves calmed as methodically our pieces engaged, fell, advanced, until I realized in one more move I would have his king! I could see in his eyes that I had him. He moved his pawn, and it took him a few moments to remove his knobby fingers

from the piece. My fingers trembled as I wrapped my own around my bishop. His king was alone at G1; I made my move, bishop to H2. This time I heard my father chuckle. Looking up, Tangen sneered at me with still three games to go. The third game started slowly and lasted for hours, the Grand Master was not about to rush head long into another loss so he tested the waters trying to draw me out. I barely came away with my second win. One more and I would win the match and my freedom.

The fourth match was a disaster. I got ahead of myself; my brother brought all his pieces into play cutting me off. In a grand flourish he even knocked my king over with his knight. I fought back a sea of emotion as we reset for the final game in the match; if I lost here all this would be for naught. The fifth game started with me bringing my pawn to D4, he did not meet me with another pawn; however, he brought out his knight to F6. We all settled in for a long game. In a sense we were both fighting for more than just a win. Three hours passed, and each of our number dwindled down to eleven. It was then that I saw it. If I moved my rook from H1 to H6 I could take his pawn. A wild look came to my brother, the Grand Master. He was going to lose, and he knew it. He moved a pawn to A5. I cleared my path of attack by moving my second rook from G6 to G5; all he could do was capture my pawn at B4. I took my final move, and with a delicate touch I took my queen from C2 and bee lined for H7, checking his king at G8. He had no moves left. He had boxed himself in with his own rook, queen, and pawn on three sides! My queen felled his king. The reverent silence was finally broken by my father’s laughter.

“Tangen, I told you my daughter would win her freedom. You made a wager on it, and she is free.” On that day I won more than my freedom. I took back the honor of my house, I made my mothers’ people proud. I managed to win my fathers’ bet, and I gained the respect and protection of the Grand Master.

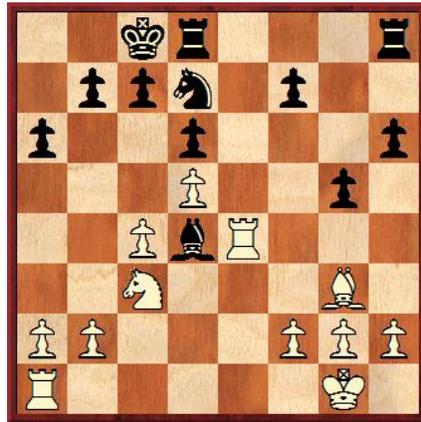

Tactics Time!

by Tim Brennan

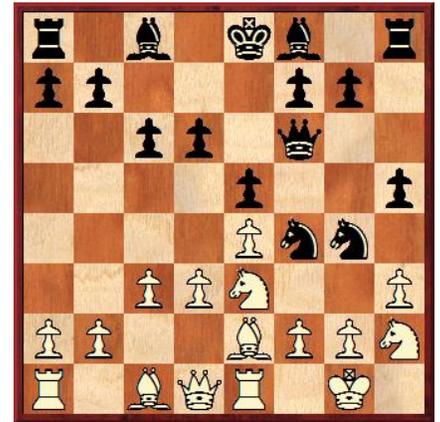

One of the best ways to improve your game is to study tactics, such as the following, from games played by Colorado players. Answers are on the next page.

1. Anthea Carson - Gary Bagstad
Winter Springs Open / Dec. 2013
 White to move

2. William Shand - Gene Lucas
Panera Bread - Academy / Nov. 2013
 Black to move

3. Alex Mekonnen - Rhett Langseth
Panera Bread - Academy / Nov. 2013
 Black to move

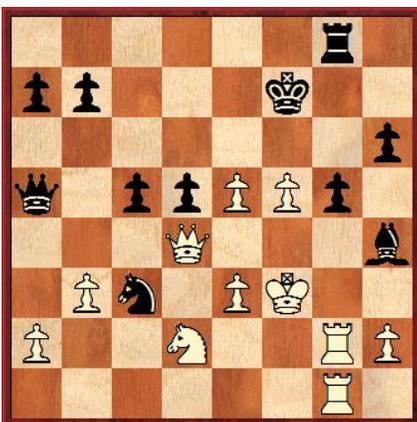

4. Alex Mekonnen - Isaac Martinez
Panera Bread - Academy / Nov. 2013
 White to move

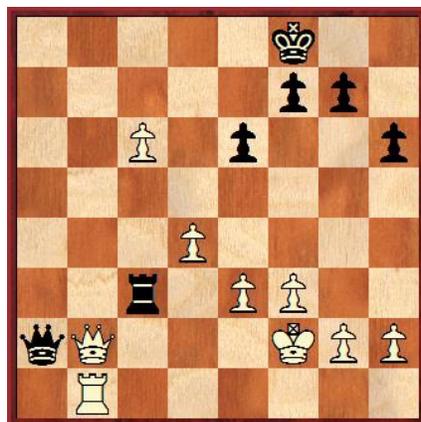

5. Brian Rountree - Justice Myers
Panera Bread - Powers / Nov. 2013
 White to move

6. Kevin Kaaoush - Paul Anderson
CSCC December Quad / Dec. 2013
 Black to move

7. Ekrem Tamkan - Mark Krowczyk
Colorado Open / Sept. 2013
 White to move

8. Mike Madsen - Richard Handoko
Colorado Open / Aug. 2013
 Black to move

9. Ed Sedillo - Suhaas Narayanan
Colorado Open / Sept. 2013
 Black to move

10 Years of Tactics Time!

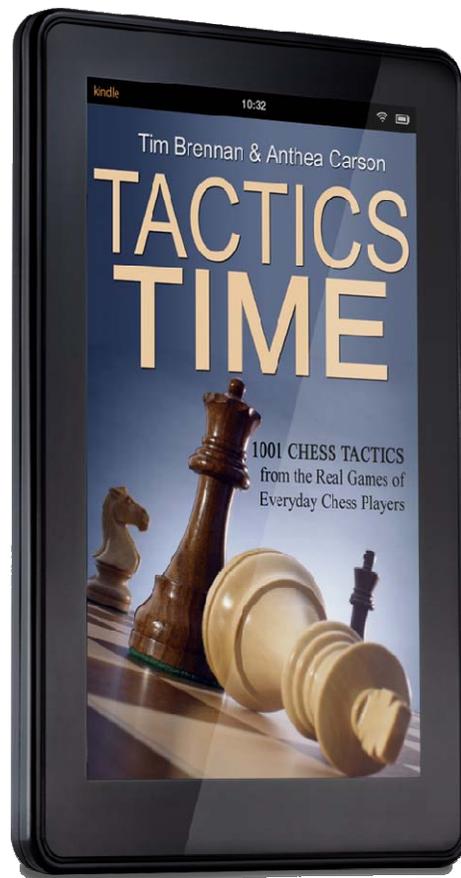

Tactics Time is celebrating its 10 year anniversary with the January 2014 issue of the *Colorado Chess Informant*! The first Tactics Time column appeared in the January 2004 issue of the magazine.

Since that time Tactics Time has grown -

- with a blog, www.tacticstime.com,
- Twitter feed, www.twitter.com/tacticstime,
- Facebook page, www.facebook.com/tacticstime,
- A free e-mail newsletter with over 2000 subscribers
- a series of kindle books, www.amazon.com/dp/B009TBYA7U
- And now a paperback version that is published by New in Chess!
www.newinchess.com/Tactics_Time-p-9991.html

**THANK YOU so much for the support over the past ten years!
I appreciate every reader, and couldn't do it without you!**

- Tim Brennan

Tactics Time answers:

1. Anthea wins a piece with **1.Bxb8 Raxb8 2.Nd4** with a discovered attack on the Black queen and Black knight on g4.
2. This is another position where the hanging bishop is first traded off to gain a time, before the kill shot. **19...Bxc3 20.bxc3 f5** with a Noah's ark style trap **21.Rd4 f4** trapping the White bishop on g3.
3. Rhett missed a cute mate in 3 with **14...Nxb3+!! 15.gxh3 Qxf2+ 16.Kh1 Qxb2# (15.Kh1 Nxf2#) (15.Kf1 Nxb2#)**.
4. White overloads the Black queen with **36.Rxd7!** The Black queen cannot capture the White rook and maintain the protection of the Black rook on h4.
5. Brian metes out justice with **31.Qf8#**.
6. **20...Bh6** skewers the White rook to the king .
7. **36.Qxb4!!** Got a well deserved "!!" from Fritz 13. Black cannot recapture because of **36...gxh4 37.Rxg8** and Black cannot stop **38.R1g7#**.
8. **33...Rc2+** with a text book X-ray attack.
9. Suhaas took it to the house with **23...Bh6+ 24.Qe3 Bxe3+ 25.Bd2 Qb2#**.

Clearing a Path to the King

by NM Todd Bardwick

(Reprinted with permission of the Author,
the United States Chess Federation
& Chess Life magazine.)

I often get asked the question, “Are masters always looking for checkmates?”

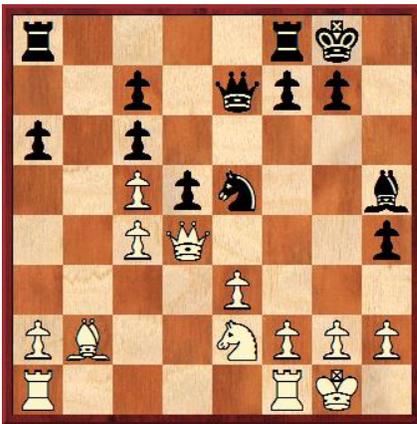

In positions where the king is safely tucked away, the answer is “no”.

But when a king is even a little bit exposed, you absolutely must look for possible mate threats.

Usually the king has some form of protection in front of him. The secret to a successful attack is by clearing a path to him by trading away the pieces protecting him or sacrificing your pieces to eliminate these defenders. Sometimes you can force his pieces to different squares, giving your pieces a path to invade.

Here is an example from Leningrad, USSR, in 1934, between Max Euwe and Peter Romanovsky.

Peter Romanovsky

Max Euwe

Position after 18...Bh5 / White to move

Black has several pieces hovering around White's king and there is a possibly crushing knight fork on f3. Black's knight is pinned to a checkmate on g7. In the actual game, White defended his knight with 19.Rfe1 and eventually the game ended in a draw.

But what if White had played the natural 19.Nf4?

Black could respond, 19...Nf3+!! 20.gxf3 Qg5+ 21.Ng2 h3 22.Qxg7+ Qxg7 23.Bxg7 h3 24.Kxg2 Kxg7 leaving Black ahead in material. In this case, Black's knight would have cleared the path for a sequence of moves that would lead to a winning endgame.

Here is a position between Anatoly Karpov and Eldis Arteaga from Skopje, Yugoslavia, 1972.

Eldis Arteaga

Anatoly Karpov

Position after 19...Rc8 / White to move

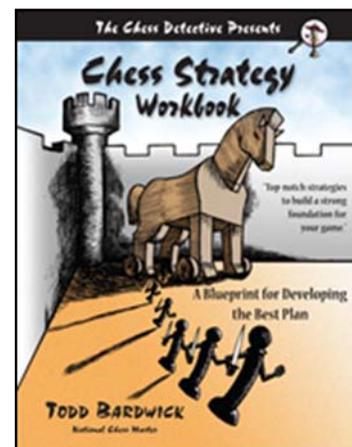

One of most common ways to clear a path to the king is by moving and exchanging pawns. Karpov played, 20.f5! gxf5 21.Bxf5! Nf8 22.Qh6 Ng6 (Black tries to cover up his king with the knight, but it is now exchanged.) 23.Bxg6 hxg6 24.Re3 (The rook-lift theme is a common way to bring the rook into the attack.) 24...Bf8 25.Qh4 Bg7 26.Rh3 Be8 27.Qh7+ Kf8 28.Qxg6 f6 29.Rxf6+! Resigns

Karpov eliminated three pawns and a knight on his way to Black's king!

Maxwell AFB Airman Soars to Top of Chess World

by Jodi L. Jordan

Air Force Culture and Language Center
Outreach Team

In just 11 years, the finance officer for Maxwell's Air Force Culture and Language Center has risen to the top of his game in a sport that can take a lifetime to master.

First Lt. Gordon Randall recently brought home four trophies from the U.S. Armed Forces Open Chess Championship, held at Ft. Eustis, Va., Oct. 12-14.

Randall, a 2010 U.S. Air Force Academy graduate, bested 34 top players to achieve a four-way tie for first place in the main event, a two-way tie for first place in the 10-minute Blitz tournament, first place in the Bughouse team event, as well as earning the award for the best sacrifice move in the two-day tournament. The scores from this event pushed his ranking in the United States Chess Federation to "expert," and placed him in the top 5 percent of all chess players in the USCF.

Ratings like that don't just happen by accident in chess. His success is the result of hard work and countless hours of playing and studying chess. Randall typically spends one or two hours in self-study and practice every day, with two separate three-hour formal practice sessions each week. The arduous schedule is necessary, he said, if you want to be the best.

"To be great at something, you have to want it," he said. "In chess, everything is right there, like it or not. There are no real tricks. The outcome depends on how hard you work and how deep you're willing to go."

Randall first began playing chess competitively for his high school team in Germantown, Md. Following a successful high school career, including helping his alma mater place in the top 10 chess schools in America, Randall entered the USAFA. He was a member of USAFA's chess team, although he said most of his playing was during his junior and senior year, when he "finally had time to play," he said with a smile.

This year marked his third trip to the U.S. Armed Forces Open, and it brought back fond memories – and a bit of redemption – for the lieutenant.

"One of the best things from this tournament was beating two of the West Point cadets. We had a big rivalry when I competed as a cadet back in 2008 and 2009," Randall said.

The wins didn't come easy, though.

"I barely won my first game. I only had 17 seconds left on the clock," he said, referring to the play clock, where taking more than the allotted time means an immediate loss.

Randall credits his work ethic for much of his success, but he also cites an ability to use "selective memory" as important to being a winning player. Where much of the conventional wisdom about chess focuses on memory skills, Randall has a different perspective.

"It's a game of memory, but it's also a game of forgetting," he said. "If you go into a game thinking about what happened in the last game, you'll make mistakes. Maybe you're playing someone who's beat you before, or you're playing someone you've lost to, that result doesn't matter. You've got to play one game at a time."

The big wins at the USAFO are just another stepping stone for Randall, who now sets his sights on the reaching the "Master" level – a level that is currently populated by the top two percent of all USCF players. He estimates that he'll reach that goal by 2015, if, he says, he continues to work hard.

"It's just going to take more time, more dedication," he said.

He'll have many opportunities to gain those points, including as a member of the U.S. team competing at the NATO chess championship in August 2014, and at next year's USAFO tournament, which he's been selected to organize.

In addition to playing competitively, Randall is also very active in his local chess community. Twice a week, he and other members of the Montgomery Chess Club meet at local venues for open play. One of those weekly sessions is primarily focused on young or new players, an endeavor close to Randall's heart.

*First Lt. Gordon Randall, the finance officer for Maxwell's Air Force Culture and Language Center, is now an 'expert' chess player in the United States Chess Federation following a strong performance at the U.S. Armed Forces Open Chess Championship in Ft. Eustis, Va.
Photo by Timothy Frantz*

"I want people to learn about and to play the game," he said. "It helps with critical thinking, proven day in and day out. It makes you think of first-, second- and third-order effects subconsciously. It teaches you how to use what you have to succeed."

Randall supports the AFCLC's Language Enabled Airman Program. More than 1,000 Airmen from across the Air Force participate in LEAP, and Randall manages the travel costs associated for their training.

His proficiency in chess is no surprise to his supervisor, Zachary Hickman, the AFCLC's Language Division chief. "Since coming to the AFCLC last year, it's been evident that Lt. Randall takes learning very seriously. He's worked hard to understand the ins and outs of our work," Hickman said. "It's clear he knows understanding his job is something he can't 'pawn' off to someone else."

You've Got Another Thing Comin'!

by Paul Anderson

In 1965, the Colorado Springs Chess Club began tracking the City Chess Champions. Since that time 33 different players have won the title and had their names inscribed on the club's plaques. Most of the players have won the title once. However, about a third of the players who have won the crown have been able to repeat as champion. Since I won my 2nd championship in 2013, I was interested in seeing who had repeated as champion and how often.

Having the city championship start about the same time as the Super Bowl era began, I was curious if any player had been able to match the success of the Pittsburgh Steelers, the NFL team to win the most Super Bowl games with 6. It is interesting to note that the NFL has had 12 teams repeat as champions, which is the exact same number of chess players to repeat as Colorado Springs City Chess champion.

So, I decided to share with you my games from each of the 4 rounds of the 2013 Colorado Springs City Chess Championship and let you know a little about the history of one of the oldest continually running clubs in the country.

The format of the championship in the early days is, for the most part, a mystery. However, since the early 1990s, it has been conducted as an unrated, 4-round, Swiss tournament (G/90) with a nominal entry fee that is all returned in prizes. The idea of continuing the City Championship as an unrated event was to allow all chess players access to the crown rather than just USCF-rated tournament players.

Some USCF members have begun to request a change to the format to make it a rated event. The idea being that the City Championship doesn't actually draw in very many unrated players, and as a rated event, it would encourage more players to join or renew their membership in the USCF, encouraging more activity throughout the year. As one of the officers of the Colorado Springs Chess Club, I am agreeable to the idea, which may be best addressed at the club's annual meeting on January 14th.

Round I

I first won a championship in 2010. While it was not an easy task to achieve for me, the numbers point to the fact that repeating as champion is harder. For many players, life just gets in the way, and careers and families call players away from the game or the area. However, my stable history in Colorado Springs and my improving chess ability over the years have made it easier for me to repeat as champion and leave behind the 21 players who claimed 1 City Chess Championship.

1x Champions (21):

1965 Francis Mason
 1966 R. Fabian
 1967 Greg Hock
 1971 Mel Davis
 1972 Walt Novak
 1975 R. Meeker
 1976 Tim Roth
 1977 Barry Biggs
 1978 R.O. Coupland
 1983 Randy Canney
 1984 Ray Haskins
 1985 Ray Mar

 1988 Tom Berndt
 1993 Red Turner
 1994 Ron Smits
 2002 Jason Caldwell
 2004 Brian Wall
 2006 Bill Wehmiller
 2008 Mitch Anderson

In 2010, I was the 4th seed and in the top half of the players in the event. In 2013, I was again a 4th seed and in the top half. This makes for an easier 1st round opponent, and I was paired with a newcomer to the club, Tom Richardson. He had recently returned to tournament chess after a long absence. So, I figured my years of experience will carry the day and allow me to move up in round 2.

**Paul Anderson
 Tom Richardson**

CSCC Championship

Colorado Springs / October 8, 2013

1.d4 d5 2.c4 Nf6 3.cxd5 Nxd5 4.e4 Nb6 5.Nc3 e6 6.Nf3 Be7 7.Bd3 0-0 8.0-0 c5 9.Be3 Nc6 10.dxc5 Nd7

Already I have gained a pawn, and the question is whether I can hang on to it. I am fairly sure it was not an intentional

pawn sacrifice, as I like my position as well as the material advantage. I am confident that Tom will have the tougher time coming up with a plan from here.

11.Na4 Bf6 12.Rc1 Nce5 13.Nxe5 Nxe5 14.Be2 Bd7 15.Nc3 Qe7 16.f4 Ng6 17.e5 Nxe5 18.fxe5 Bxe5 19.g3 Rfd8 20.Qe1 g6

I have gained more material after Tom develops his queen to an unfortunate square on move 15, leaving his dark bishop lacking squares and open to an attack from my pawn push. I jump on the mistake and begin to look for ways to reduce his army to the point where resignation is the best course for him.

21.Bf3 Bc6 22.Bxc6 bxc6 23.Qf2 f5 24.Rfd1 Qg7 25.Rxd8+ Rxd8 26.Rd1 Rxd1+ 27.Nxd1 Qc7 28.Bf4 Bxf4 29.Qxf4 Qxf4 30.gxf4 h6

Tom helps me out a bit here by trading off his pieces quickly. Now it is just a matter of getting my knight to the prime spot.

31.Nf2 Kg7 32.Nd3 g5 33.Kf2 Kf6 34.Ke3 g4 35.Ne5 1-0

With the knight threatening to create a passed pawn and my king holding off his pawn threats, the writing is on the wall and Tom gives me the gracious concession.

Round II

Within the first decade of the city championship, a couple of players gained their 2nd titles. The first player to regain the title, Robert Jordan, was also the first player to win back-to-back titles. However, other players took a little more time between titles. The record-holder for waiting the most time between winning championships is Shaun MacMillan. Shaun won his 1st title in 1982 as a youthful expert and waited 25 years before earning his second, as a hard-working, if less-talented, renewed student of the game.

2x Champions (9):

1968 Robert Jordan
 1969 Robert Jordan
 1970 Carl Freeman
 1973 Ken Case
 1974 Carl Freeman
 1979 Joe DeVico
 1980 Joe DeVico

1981 Ken Case
 1982 Shaun MacMillan
 1995 Chris Brunt
 1996 Chris Brunt
 1999 Jeff Fox
 2001 Josh Bloomer
 2005 Josh Bloomer
 2007 Shaun MacMillan
 2009 Jeff Fox
 2010 Paul Anderson
 2013 Paul Anderson

In the 2nd round, my fear begins to increase. I have to face Mark McGough with the Black pieces. The problem is that Mark and I have played 41 games against each other in rated play and far more in blitz games. Plus, Mark is a great student of the game, studying his losses and coming up with new ideas to eliminate his past mistakes. He even gets advice from NM Josh Bloomer on what opening variations he can use against me.

Mark McGough
Paul Anderson

CSCC Championship
Colorado Springs / October 15, 2013

1.d4 c6 2.c4 g6 3.Nc3 Bg7 4.Nf3 d6 5.e4 Bg4 6.Be2 Nf6 7.0-0 0-0 8.Be3 Qc7 9.Rc1 e5 10.dxe5 dxe5 11.h3 Bxf3 12.Bxf3 Rd8 13.Qc2 Nbd7 14.Rfd1 Nf8 15.Qb3 b6 16.a4 Ne6 17.c5 Nxc5 18.Bxc5 bxc5 19.Qc4 Qb6 20.b3 Bf8

I have survived the opening and gained a pawn. This time I am sure that Mark gave up the pawn intentionally. I think he was worried about the knight being well supported on d4 and figured that he could regain the double pawn eventually.

21.Ne2 Rab8 22.Rxd8 Rxd8 23.Rc3 Kg7 24.Nc1 Rd4 25.Qe2 Qb4 26.Na2 Qa5 27.Qc2 Qd8 28.Rc4 Rd2 29.Qb1 h5 30.Nc3 Qd3 31.Qxd3 Rxd3 32.Be2 Rd4 33.f3 Nd7 34.Nd1 a5 35.Kf2 Kf6 36.Ke3 Bh6+ 37.Kf2 Nb6 38.Rc2 Bf8 39.Ne3 h4 40.Nc4 Nxc4

I have been able to hold on to the pawn, but it was more out of luck than skill. As Mark gets into time pressure, I start to make some impulsive moves. On move 36 and 37, I remove both the bishop and knight from protecting the c5 pawn. Fortunately, Mark had little time to survey the position and just reacted to the attack on his rook. So, I restored the protection

on the pawn and tried to come up with a better plan.

41.Bxc4 Kg5 42.Ke2 Kf4 43.Bxf7 g5 44.Kf2 c4 45.Bxc4 Bc5 46.Kf1 Rd1+ 47.Ke2 Rg1 48.Kd3 Bd4 49.Be6 c5 50.Kc4 Kg3 51.Bg4 Rb1 52.Bf5 Bf2 53.Be6 Kxg2 54.Kb5 Kxf3 55.Bf5 Rxb3+ 56.Kxa5 Rb4 57.Ra2 Bd4 58.Ka6 c4 59.Ka5 Rb2 60.Rxb2 Bxb2

My plans begin to bounce back and forth between good and bad ideas. Again I remove the protection from a pawn, and this time, Mark sees it before I do. I am undaunted by the set back and devise a plan to sacrifice another pawn for a bishop and rook invasion. Despite being a pawn down, I am hopeful that Mark's time pressure and my more active pieces can create a winning opportunity. I finally see the light at the end of the tunnel after picking up a couple of Mark's pawns and cutting off his king. As I begin to relax with time and material on my side, I quickly decide to trade off rooks only to realize too late that it turned my win into a draw.

61.Kb4 c3 62.Kb3 Ke3 63.Kc2 Kd4 64.a5 Ba3 65.a6 Bc5 66.Bc8 Kc4 67.Be6+ Kb4 68.Bc8 Bd4 69.Bf5 Kb5 70.Bc8 Kc4 71.Bf5 Ba7 72.Be6+ Kd4 73.Bf5 Kc4 74.Be6+ Kb4 75.Bf5 Bd4 76.Bc8 Kb5 77.Bb7 g4 78.hxg4 h3 79.Bc8 h2 80.g5 h1Q

Mark is down to seconds left on his clock and has no time to find any subtle moves. I feel like I have one last shot if I can find a way to draw his bishop off the b8-h3 diagonal. However, I don't have much time either so I am mostly in trial and error mode. Finally, the bishop comes off the key diagonal, and I use my time to work out the win. Whew!

81.g6 0-1

Round III

The players with 3 city championships include a couple of National Masters. Jim Burden opted for the fast approach and became the 1st and only back-to-back-to-back champion by rattling off 3 titles in a row in the late 80s and early 90s a la the Chicago Bulls of the same era. However, Richard "Buck" Buchanan followed up Jim's performance with the slow method, waiting close to 10 years between each of his titles.

3x Champions (2):

1989 Jim Burden
 1990 Jim Burden
 1991 Jim Burden
 1992 Richard Buchanan
 2003 Richard Buchanan
 2012 Richard Buchanan

In round 3, I move up to the top board and remain as one of the 3 players with all victories (2.0). I am guessing that I might have a shot at another title now, as the top seed NM Josh Bloomer suffered a loss in the second round, leaving me a slightly easier task of beating the #2 and #3 seeds for the title. However, I have to face the #2 seed, Imre Barlay, right away. We have played 6 times in USCF-rated tournaments and have an equal result (2 wins, 2 losses, 2 draws). So, I figure I have a 50/50 shot to get the win.

I feel I can increase my chances with a little preparation. So, I call on my preparation partner, Tim Brennan. As the author of the Tactics Time books, he has collected a huge database of games from Colorado chess players. Unfortunately, the clearest idea I can glean from the games is that I should not play like Rhett Langseth does against Imre. As Imre's most common foe, Rhett has only 1 win in 10 tries. So, I don't go into the game with a good idea of what to do.

Paul Anderson
Imre Barlay

CSCC Championship
Colorado Springs / October 22, 2013

1.d4 d5 2.c4 e6 3.Nc3 Be7 4.Nf3 Nf6 5.Bg5 Nbd7 6.e3 h6 7.Bh4 0-0 8.Rc1 b6 9.cxd5 exd5 10.Bd3 Bb7

We remain in the book line of the Queen's Gambit Declined. I feel this favors Imre with his years of experience and much deeper knowledge of chess openings.

11.0-0 Ne4 12.Bxe7 Qxe7 13.Qb3 Nxc3 14.Rxc3 c5 15.Qa3 Rfe8 16.Bb5 c4 17.Qa4 Red8 18.Bxd7 Qxd7 19.Qxd7 Rxd7 20.a4 f6

I thought that the c4 pawn push might become a liability in the endgame and figure it is fine for me to trade off queens and try to find a plan to take advantage of it by creating a passed pawn on d4 or an

isolated pawn on d5. However, my ideas are more fantasy than anything concrete.

21.Ra1 Rdd8 22.Ne1 Bc8 23.Nc2 Bf5
24.Nb4 Kf7 25.Kf1 a5 26.Na2 Rdb8
27.Nc1 b5 28.axb5 Rxb5 29.b3 cxb3
30.Rxb3 Rab8

I was having a hard time deciding where I wanted to put my knight, but I didn't want to trade it off. I felt that the knight to b4 and the king to f1 put the game in Imre's favor, as I didn't realize the problems with the pawn attack on a5. All my pieces seem to be getting in each other's way, and I am just hoping to hold off possible mating threats.

31.Rba3 Rc8 32.Nb3 Bd3+ 33.Ke1 Rc2
34.Nd2 Bc4 35.Nxc4 dxc4 36.R3a2 Rxa2
37.Rxa2 f5 38.f3 Ke6 39.e4 fxe4 40.fxe4
Rb3

I am thrilled to have survived his invasion and begin to think maybe I can still win this and hold on to my shot at the title. However, time is a huge factor now for both of us. I was hoping to keep him behind in time and hope for a time pressure blunder. Imre's clock went under 5 minutes first, but I quickly dropped below him trying to figure out how to save my connected passed pawns. I still felt a draw would ruin my chances at the title and ignored Imre's draw offer. After a few more pointless moves, I came to my senses and realized that my only choices were going to be a loss, due to pride, or a draw, with humility, and focus on winning 2nd place.

41.Ke2 Rd3 42.d5+ Ke5 43.Rxa5 Kxe4
44.Rc5 Rxd5 45.Rxc4+ Ke5 46.Rc7 Kf6
47.Rc6+ 1/2-1/2

Round IV

The player with the most Colorado Springs City Championships and only 4-time champion is Dan Avery. Dan was a club regular in the late 90s and early 2000s. He won 3 titles in my 1st four years at the club and added his 4th a couple years ago, becoming the 1st player to win titles in 3 different decades.

4x Champions (1):

1997 Dan Avery
1998 Dan Avery
2000 Dan Avery
2011 Dan Avery

In the final round, I remained on board 1, despite the draw with Imre. I still had a chance at the title, but I had to beat Dan to even have a shot at the crown. A draw or a loss would knock me out of contention. A win could leave me and Imre tied for 1st should he win as well. However, Imre took a bye in the final round and made the game between Dan and me the deciding factor. In Dan's past 4 title runs, he had beaten me on his way to victory. In my only title run, I had beaten Dan. Now it was down to the 2 of us in the final round with the title on the line for the 1st time. Dan could claim his 5th title, or I would become a repeat champion.

After gaining little from my preparation for Imre, I opted to just play the game against Dan by reliving my 2010 victory and ignoring the 2011 debacle.

**Dan Avery
Paul Anderson**

CSCC Championship Colorado Springs / October 29, 2013

1.d4 c6 2.c4 g6 3.Nc3 Bg7 4.e4 d6 5.Be3
Nd7 6.h3 a6 7.Nf3 b5 8.a3 Bb7 9.Be2
Rc8 10.0-0 Qc7

In 2010, I had won with the Black pieces, but, in 2011, I lost with the Black pieces. So, I figured it would probably be an endgame that decided the outcome and not an opening mistake. The only thing I wanted from the opening was to encourage Dan to castle kingside and do so myself.

11.Rc1 Qb8 12.Qd2 Ngf6 13.e5 dxe5
14.dxe5 Nxe5 15.Nxe5 Qxe5 16.Bf4 Qe6
17.Rfe1 Rd8 18.Qc2 Qc8 19.Bf3 e6
20.Ne4 Nxe4

I was just about to achieve my goal of kingside castle when Dan goes on the attack. The pawn push to e5 forces me to take the material or suffer a hideous position. I am just hoping that I have not missed anything with my king and queen in the center. Fortunately, I can trade off some more material, hold my pawn, and get my queen out of the center.

21.Qxe4 0-0 22.cxb5 axb5 23.Rc2 Qa8
24.Qe3 Bd4 25.Qe2 c5 26.Bxb7 Qxb7
27.Be5 Rd5 28.Bxd4 cxd4 29.Qd3 Rc8
30.Rec1 Rxc2

I finally get to castle still up a pawn. I just need to activate my light bishop, and the extra pawn is going to amount to some-

thing. When I see the opportunity to activate my dark bishop to d4 and push the c5 pawn, I realize the winning chances have swung heavily in my favor. Dan is going to be fighting for a draw. However, that is all he needs to get the title.

31.Rxc2 Qd7 32.f4 Kg7 33.Rd2 Qc7
34.g3 Qc4 35.Kf2 Kf6 36.Ke2 h5 37.Rc2
Qxd3+ 38.Kxd3 Kf5 39.Rf2 f6 40.Rf3 g5

I fix my rook behind my passed pawn and look to trade off the queens. Once the queens come off, I can activate my king and begin to press my kingside pawn advantage, looking for an opportunity to gain a second pawn.

41.fxg5+ Kxg5 42.Rf4 e5 43.h4+ Kg6
44.Rf2 Rc5 45.Ke4 Rc1 46.Rf3 Re1+
47.Kd5 Re3 48.Rf2 Kf7 49.Rc2 Rxc3
50.Rc7+ Kg6

I try limit any activity Dan's rook can get, but I finally see an opportunity to get the second pawn with my king in a relatively safe location.

51.Ke6 Rg4 52.Rf7 Rf4 53.Rf8 e4
54.Rg8+ Kh7 55.Kf7 Rg4 56.Rd8 e3
57.Kxf6 e2 58.Rd7+ Kh6 59.Re7 Rf4+
0-1

Dan makes one last ditch effort to find a perpetual check and even offers the draw on move 55 with 53 seconds left on his clock. Of course, Dan has to scream the draw offer, as I still have Judas Priest's, "You Have Another Thing Comin'" blaring in my headphones. Peter Barlay said, "It was the loudest draw offer I've ever heard." I didn't realize that I had left myself only one winning move, but I found it.

From India With Love

by Joe Fromme, Jr.

The chess community of India produced unquestionably the most entertaining World Championship match since Fischer vs. Spassky, Reyjavik Iceland 1972. The driving force of this huge effort deserves special mention of a brilliant, incredibly accomplished, and distinguished lady. Her name is Selvi J. Jayalalithaa who is the Honorable Chief Minister of the State of Tamil Nadu. It was her photograph prominently displayed onstage during the match. My sincerest gratitude to her for this colossal promotion of chess worldwide.

Long ago as a child in Boulder, Colorado, I gathered my pocket change to purchase a newspaper because of a single article about the "Match of the Century". It felt super cool to get my hands on the printed moves of a world championship game being played a million miles away in a place called Iceland. Now, some forty years later, I finally would witness technology provide something better than frozen pizza.

The World Chess Championship 2013 in Chennai India was not only a world class spectacle, it was an experience.

Immediate most obvious was the immense clear glass soundproof barrier separating the playing stage from the spectator area. It surely must have pleased the players that so much work went into providing absolute quiet for their games. Well done organizers and workers! Both players enjoyed the same refreshment area in a spirit of cordially demonstrating proper behavior being a good omen for the match. I proudly salute the Indian effort in displaying the best chess show in history.

The commentary team was superb, but also fortunately the move by move comments was geared for mass entertainment instead of the so called experts who refuse to exist without infernal data bases and over inflated egos. Former World Champion Susan Polgar delivered clear relevant observations with her usual professionalism and beautiful charm. She is indeed as pleasant on screen as she is in person. Grandmaster Ramesh was the embodiment of good manners, intelligent observations, but also having had Viswanathan as a mentor, he

could fill in all the small facts regarding the Champion and his contributions to chess in India. International Master Tania Sochdev's most interesting alternative ideas and infectious laughter was the sublime tonic for knocking any dust, if any, off the show. International master Laurence Trent showed decent analysis but his self deprecating humor was priceless. Some 200 million viewers in 48 countries! That speaks for itself.

Awakening for every game at 2:00am was slightly inconvenient, however, once ensconced comfortably by the fireside with my Linus blanket, black coffee and laptop, I felt in my heart and soul that life did not get any better than this. I had traveled long in space time from that little boy in the green park clutching print moves, to seeing the world's best chess players LIVE! My most sacred praises to the Hindu God Shiva for making this my reality! Congratulations to World Chess Champion Magnus Carlsen of Norway. My complete admiration to five times World Champion Viswanathan Anand for being a chess legend.

From a Land Far Away

by Grandmaster Tejas Bakre

It has been a great pleasure playing in the Bobby Fischer Memorial in Palmer Lake, Colorado the last two years. A tournament run by Joe Fromme from the heart. Very few organizers in the world run a tournament with so much passion and heart into it. Hence, its always wonderful to be a part of this tournament. It is always held at such a beautiful location that I always feel obliged to create something new on the board.

Ryan Swerdlin (1932)
GM Tejas Bakre (2514)
Palmer Lake, CO
May 4, 2013

1.c4 e5 2.Nc3 Nc6 3.Nf3 Nf6 4.d3 h6!?
I was playing a young kid and wanted to take him out of opening preparation. The position is a reversed Sicilian from the

English opening (4...d5 5.cxd5 Nxd5=).

5.Nd5 My young opponent wants to prevent the freeing move d5 for black . In general it would have been ok but here Black will be developing very fast and has chances of taking the initiative.

5...Bc5 6.e3 0-0 7.d4? White immediately wants to capture the center. Here is an idea which I discovered which I checked hasn't occurred in any of the previous games played. 7.Be2 d6 8.0-0 would have been a safer option and I am glad he didn't choose that as I would not have been able to play the beautiful idea.

7...exd4 8.exd4 Nxd4!! Here I remember neither my opponent nor the onlookers understood what was going on. Everyone thought that after 40 hours of an arduous journey that I am jet lagged and tired and have blundered a piece! The reason is, it's very rare to have a combination as early as move 8 in positional openings like the English.

9.Nxd4 Nxd5 10.cxd5 Qh4! 11.Be3 Re8!
This was the beautiful trick. Now due to

the pin on the e-file the knight on d4 is hanging and due to the diagonal pin, the bishop on e3 is hanging. White is unable to save the piece and so Black becomes a pawn up with a completely winning position.

12.Nc2 12.Nf5 Bb4+ 13.Ke2 Qg4+--;
12.Nf3 Rxe3+ 13.Be2 Rxf3 14.gxf3
Bb4+ 15.Kf1 d6--

12...Bxe3 13.Nxe3 Rxe3+ 14.Be2 c5 The rest is just a formality.

15.Qd2 Re5 16.d6 b6 17.0-0 Bb7
18.Rad1 Rae8 19.Rfe1 Bxg2! 20.Kxg2
Rg5+ 21.Kh1 Qxf2 22.Bg4 Rxe1+
23.Qxe1 Qxe1+ 24.Rxe1 Rxd4 0-1

The beauty of chess is in creating ideas. Such ideas make chess beautiful. In today's era it is extremely difficult to create new ideas as the general level of defense has gone up compared to previous years. I am really thankful to Joe Fromme and his friends for inviting me to this wonderful tournament.

Get Blitzed Rated Blitz Chess at the Corner Bakery January 25, 2014

Time Control: G/3; inc/3.

Site: Corner Bakery Cafe, 1147 16th Street Mall, Denver, CO 80202 16th and Arapahoe, downtown Denver, near the clock tower.

Sections: A USCF blitz rated round robin tournament with 3 sections - Over and Under 1800, limited to 12 players in each section. In addition, there will be an unrated non-USCF member section limited to 12 players.

Format: After a single round robin, in each section, the players

will divide into 3 Quads by score and rating and play a double round robin Quad for the prize money.

Rules/Scoring: Each player will receive a copy of the USCF draw claim rules before the tournament begins. These rules and only these rules will apply. 3-1-0 scoring system will be used. Touch move.

Tiebreaks: Tie break will be two games and if still tied, one Armageddon game with black having draw odds.

Entry Fee: \$22, before January 23, 2014; \$27 on site.

Prizes: 100% of entry fees, minus only the USCF rating fee.

The 1st Quad of each section will have 3 cash prizes: the 2nd Quad, 2 cash prizes and the 3rd Quad, 1 cash prize. Taking the rating fee into account and assuming 12 player sections, the prizes in the Over 1800 section would be about:

1st Quad:	2nd Quad:
1st - \$80.	1st - \$40
2nd - \$60.	2nd - \$25
3rd - \$50.	

The Under 1800 section prizes would be \$5 less for each prize in the 1st and 2nd Quads and the Unrated section \$10 less for each prize in the 1st and 2nd Quads. 3rd Quad prize for all 3 sections would be \$15.

Registration: 9:00-10:00am.

Rounds: Single rounds every 10-12 minutes, with a lunch break before double round Quad play in each section begins. .

Entries: Tim Brennan 1340 Farnham Point, Apt. 206, Colorado Springs, CO 80904

Phone: (303) 883-2684

E-mail: liencam2@yahoo.com

The tournament will last, including lunch and any necessary tie breaks, about 4 - 5 hours. Please do not enter if you cannot commit to that amount of time. Thank You.
